Summary

Full Stack Web Developer trained in PHP, Laravel, MySQL, and client-side technologies, with experience building dynamic web applications following MVC architecture and modern development practices.

EDUCATION

Borg El Arab University of Technology

Information Technology

TRAINING

Information Technology Institute (ITI)

Full Stack Web Development using PHP (120 hrs.)

- Course Topics:
 - Client-Side Technologies (48 hrs)
 - MySQL Database Management (18 hrs)
 - Laravel Framework (30 hrs)
 - PHP Programming (30 hrs)
- Completed intensive training program covering modern web development technologies and frameworks.
- Gained hands-on experience in building dynamic web applications using PHP and Laravel framework.
- Developed skills in database design and management using MySQL.
- Learned modern client-side technologies for creating interactive user interfaces.

SKILLS

Languages	DB	Framework	Tools	AI Tools
• HTML • CSS • JavaScript • PHP	• MySQL • MongoDB	• Laravel • Vuejs • Bootstrap • Tailwind	• Git • GitHub • JMeter • Redis	• Claude • Chatgpt-5 • Lovable • Antigravity • Vercel • Google Stitch

Projects

1- Learning Management System (LMS)

Tools (Laravel, MySQL, Bootstrap)

[Watch Video](#) [GitHub Repo](#)

- Developed a complete Learning Management System (LMS) using Laravel and MySQL.
- Implemented authentication, course management, and student enrollment features.
- Built responsive dashboards and optimized database performance for scalability.

2- Social Media

Tools (Laravel, MySQL, Bootstrap)

[Live Demo](#) [GitHub Repo](#)

- Developed a full-stack Social Media Platform using Laravel 12 and MySQL, featuring posts, comments, and user profiles.
- Implemented authentication system with role-based access control (Admin/Subscriber) including login, register, and logout.
- Built an Admin Dashboard for managing users and posts with full CRUD operations and image upload support.
- Designed a responsive UI with glassmorphism aesthetics using Bootstrap 5, interactive comment system.

- Built a full-stack productivity web application for managing personal tasks and links in one secure place.
- Implemented user authentication with fully encrypted personal data, ensuring complete privacy and isolation between user accounts.
- Developed task management features including add, complete, edit, delete, and quick search.
- Developed link management features including add, quick copy, open in new tab, delete, search, and categorybased filtering.
- Designed a clean responsive UI with Bootstrap, supporting cross-device access via secure login.
